EXPERIENCE

Eclectika, NIT Raipur (C.G) — *Web Developer*

JULY 2018 - PRESENT

- Frontend development: worked with Bootstrap, CSS, and HTML to create visual designs including responsive design

- Used javascript to parse data from a JSON API to show data in the Event section of the website.

Allsoft, Raipur (C.G) — *Web Developer Intern*

MAY 2019 - JULY 2019

- Developed backend server using Nodejs and SocketIO.

- Worked with Firebase realtime database to store data and to show real time updates to the users.

PROJECTS

Online Real Time Auction

- An online real time auction app for conducting auctions.
- Enables user i.e bidder or auctioneer to interact in real time.
- The backend server is built using nodejs and socketIO which makes read and write of data fast.

→ Technologies used : Nodejs, SocketIO, Firebase
→ Github : https://github.com/DhengreAni18/E-auction

DevConnect

- A Social networking website for developers with functionality to create and view profiles.
- Post feature with comment and like functionality.

→ Technologies used : MongoDB, Nodejs, Reactjs
→ Github: https://github.com/DhengreAni18/DevConnect
